PB97-119143 *01,187* Not available NTIS

PB97-119150
Automated Guarded Bridge for Calibration of Multimegohm Standard Resistors.
PB97-119150 *02,289* Not available NTIS

PB97-119168
Resistance Measurements from 10 M Omega to 1 T Omega at NIST.
PB97-119168 *02,290* Not available NTIS

PB97-119176
Conversion of a 2-Terminal-Pair Bridge to a 4-Terminal-Pair Bridge for Increased Range and Precision in Impedance Measurements.
PB97-119176 *02,103* Not available NTIS

PB97-119184
NIST Comparison of the Quantized Hall Resistance and the Realization of the SI Ohm Through the Calculable Capacitor.
PB97-119184 *02,291* Not available NTIS

PB97-119192
NIST Comparison of the Quantized Hall Resistance and the Realization of the SI Ohm Through the Calculable Capacitor. Conference Proceedings, June 17-20, 1996.
PB97-119192 *02,292* Not available NTIS

PB97-119200
Specular and Diffuse Reflection Measurements of Electronic Displays.
PB97-119200 *02,208* Not available NTIS

PB97-119218
Computations of Enhanced Soot Production in Time-Varying CH4/Air Diffusion Flames.
PB97-119218 *01,440* Not available NTIS

PB97-119226
National Status and Trends Program Specimen Bank: Sampling Protocols, Analytical Methods, Results, and Archive Samples.
PB97-119226 *02,598* Not available NTIS

PB97-119234
Vibrational Spectra of Molecular Ions Isolated in Solid Neon. 13. Ions Derived from HBr and HI.
PB97-119234 *01,188* Not available NTIS

PB97-119242
Comparisons of Some NIST Fixed-Point Cells with Similar Cells of Other Standards Laboratories.
PB97-119242 *00,655* Not available NTIS

PB97-119259
Novel Radiochromic Films for Clinical Dosimetry.
PB97-119259 *03,641* Not available NTIS

PB97-119267
Internal Droplet Circulation Induced by Surface-Driven Rotation.
PB97-119267 *02,500* Not available NTIS

PB97-119275
Orientational Fluctuations, Diffuse Scattering, and Orientational Order in Solid C60.
PB97-119275 *04,176* Not available NTIS

PB97-119283
Micromachined Coplanar Waveguides in CMOS Technology.
PB97-119283 *02,456* Not available NTIS

PB97-119291
Calibration and Performance of GafChromic DM-100 Radiochromic Dosemeters.
PB97-119291 *00,703* Not available NTIS

PB97-119309
Interaction of Citric Acid with Hydroxyapatite: Surface Exchange of Ions and Precipitation of Calcium Citrate.
PB97-119309 *03,584* Not available NTIS

PB97-119317
Active High Voltage Divider with 20-PPM Uncertainty.
PB97-119317 *02,104* Not available NTIS

PB97-119325
Transport by Gravity Currents in Building Fires.
PB97-119325 *01,441* Not available NTIS

PB97-119333
Liquid Chromatographic Determination of Carotenoids in Human Serum Using an Engineered C30 and a C18 Stationary Phase.
PB97-119333 *03,512* Not available NTIS

PB97-119341
Self-Consistent 'GW' and Higher-Order Calculations of Electron States in Metals.
PB97-119341 *01,189* Not available NTIS

PB97-119358
Thermodynamic Properties of Silicides. 5. Standard Molar Enthalpy of Formation at the Temperature 298.15 K of Trimolybdenum Monosilicide Mo3Si Determined by Fluorine-Combustion Calorimetry.
PB97-119358 *01,190* Not available NTIS

PB97-119366
Electronic Structure and Phase Equilibria in Ternary Substitutional Alloys.
PB97-119366 *03,378* Not available NTIS

PB97-119374
Positive and Negative Cooperativities at Subsequent Steps of Oxygenation Regulate the Allosteric Behavior of Multistate Sebacylhemoglobin.
PB97-119374 *03,486* Not available NTIS

PB97-119382
DnaJ, DnaK, and GrpE Heat Shock Proteins are Required in 'ori'P1 DNA Replication Solely at the RepA Monomerization Step.
PB97-119382 *03,557* Not available NTIS

PB97-119390
Anomalous Relation between Time and Frequency Domain PMD Measurements.
PB97-119390 *04,398* Not available NTIS

PB97-119408
Vortex Images in Thin Films of YBa2Cu3O(sub 7-x) and Bi2Sr2Ca1Cu2O(sub 8+x) Obtained by Low-Temperature Magnetic Force Microscopy.
PB97-119408 *04,815* Not available NTIS

PB97-121321
Fault Diagnosis of an Air-Handling Unit Using Artificial Neural Networks.
PB97-121321 *00,283* Not available NTIS

PB97-121339
Computer Simulations of Binder Removal from 2-D and 3-D Model Particulate Bodies.
PB97-121339 *00,418* Not available NTIS

PB97-121610
Science, Technology, and Competitiveness: Retrospective on a Symposium in Celebration of NIST's 90th Anniversary and the 25th Anniversary of the Gaithersburg Laboratories, November 14-15, 1991.
PB97-121610 *02,696* PC A08/MF A02

PB97-121636
Text REtrieval Conference (4th) (TREC-4). Held in Gaithersburg, Maryland on November 1-3, 1995.
PB97-121636 *01,786* PC A99/MF E08

PB97-121826
International Green Building Conference and Exposition (3rd). Held in San Diego, California on November 17-19, 1996. (Reannouncement with new abstract).
PB97-121826 *02,531* PC A12/MF A03

PB97-122212
Interface-Filter Characterization of Spectraradiometers and Colorimeters.
PB97-122212 *04,399* Not available NTIS

PB97-122220
Antiferromagnetic Interlayer Correlations in Annealed Ni80Fe20/Ag Multilayers.
PB97-122220 *03,109* Not available NTIS

PB97-122238
Publication and Presentation Abstracts, 1996.
PB97-122238 *03,585* Not available NTIS

PB97-122246
Flat and Curved Crystal Spectrography for Mammographic X-ray Sources.
PB97-122246 *03,642* Not available NTIS

PB97-122253
Dependence of the Thermal Electron Attachment Rate Constant in Gases and Liquids on the Energy Position of the Electron Attaching State.
PB97-122253 *01,996* Not available NTIS

PB97-122261
Environmental Aspects of Halon Replacements: Considerations for Advanced Agents and the Ozone Depletion Potential of CF3I.
PB97-122261 *03,301* Not available NTIS

PB97-122279
Conference Report: Calorimetry Conference (50th).
PB97-122279 *03,722* Not available NTIS

PB97-122287
Usability Engineering: Industry-Government Collaboration for System Effectiveness and Efficiency.
PB97-122287 *01,514* Not available NTIS

PB97-122295
Experimental Determination of the Rate Constant for the Reaction of C2H3 with H2 and Implications for the Partitioning of Hydrocarbons in Atmospheres of the Outer Planets.
PB97-122295 *00,112* Not available NTIS

PB97-122303
CSL View of Applications Portability, Scalability, and Interoperability.
PB97-122303 *01,787* Not available NTIS

PB97-122311
Materials and Fire Threat.
PB97-122311 *01,442* Not available NTIS

PB97-122329
NIST Watt Experiment: Monitoring the Kilogram.
PB97-122329 *01,997* Not available NTIS

PB97-122337
Small Angle Neutron Scattering Study of the Structure and Formation of MCM-41 Mesoporous Molecular Sieves.
PB97-122337 *03,110* Not available NTIS

PB97-122345
Generalized Optical Theorem for On-Axis Gaussian Beams.
PB97-122345 *04,177* Not available NTIS

PB97-122352
Radiocarbon Measurements of Atmospheric Volatile Organic Compounds: Quantifying the Biogenic Contribution.
PB97-122352 *02,574* Not available NTIS

PB97-122360
Measurement of the Atomic Na(3P) Lifetime and of Retardation in the Interaction between Two Atoms Bound in a Molecule.
PB97-122360 *04,178* Not available NTIS

PB97-122378
Large Local-Field Corrections in Optical Rotatory Power of Quartz and Selenium.
PB97-122378 *04,400* Not available NTIS

PB97-122386
Single-Phase Heat Transfer and Pressure Drop Characteristics of an Integral-Spine Fin Within an Annulus.
PB97-122386 *04,179* Not available NTIS

PB97-122394
Survey of the Components of Display-Measurement Standards.
PB97-122394 *02,209* Not available NTIS

PB97-122402
Oxidation of Ferrous and Ferrocyanide Ions by Peroxyl Radicals.
PB97-122402 *01,191* Not available NTIS

PB97-122410
SC4 Short Names Registry.
PB97-122410 *02,799* Not available NTIS

PB97-122428
Application of the Collocation Method in Three Dimensions to a Model Semiconductor Problem.
PB97-122428 *02,457* Not available NTIS

PB97-122436
Complex Time Dependence of the EPR Signal of Irradiated L-alpha-alanine.
PB97-122436 *04,180* Not available NTIS

PB97-122444
DNA Base Damage in Lymphocytes of Cancer Patients Undergoing Radiation Therapy.
PB97-122444 *03,643* Not available NTIS

PB97-122451
Perpendicular C-H Stretching Band nu9/nu13 and the Torsional Potential of Dimethylacetylene.
PB97-122451 *01,192* Not available NTIS

PB97-122469
Photonic Band-Structure Effects for Low-Index-Contrast Two-Dimensional Lattices in the Near Infrared.
PB97-122469 *04,401* Not available NTIS

PB97-122477
Nanoindentation and Instrumented Scratching Measurements on Hard Coatings.
PB97-122477 *03,111* Not available NTIS

PB97-122485
Overview of a Radiation Accident at an Industrial Accelerator Facility.
PB97-122485 *02,612* Not available NTIS

PB97-122493
Measuring Nondipolar Asymmetries of Photoelectron Angular Distributions.
PB97-122493 *01,193* Not available NTIS

PB97-122501
Wear Modeling of Si-Based Ceramics.
PB97-122501 *03,112* Not available NTIS

PB97-122519
NO Production and Destruction in a Methane/Air Diffusion Flame.
PB97-122519 *01,443* Not available NTIS

PB97-122527
Characterization of Time-Dependent Dielectric Breakdown in Intrinsic Thin SiO2.
PB97-122527 *02,458* Not available NTIS

PB97-122535
Parametric Study of Wall Moisture Contents Using a Revised Variable Indoor Relative Humidity Version of the 'Moist' Transient Heat and Moisture Transfer Model.
PB97-122535 *00,419* Not available NTIS

PB97-122543
Absence of Quantum-Mechanical Effects on the Mobility of Argon Ions in Helium Gas at 4.35 K.
PB97-122543 *01,194* Not available NTIS

PB97-122550
Xi-Vector Formulation of Anisotropic Phase-Field Models: 3-D Asymptotics.
PB97-122550 *04,816* Not available NTIS

PB97-122568
Determination of Anomalous Superexchange in MnCl2 and Its Graphite Intercalation Compound.
PB97-122568 *00,666* Not available NTIS

PB97-122576
Material Characterization By a Time-Resolved and Polarization-Sensitive Ultrasonic Technique.
PB97-122576 *02,764* Not available NTIS

PB97-122584
Design, Construction and Application of a Large Aperture Lens-Less Line-Focus PVDF Transducer.
PB97-122584 *02,765* Not available NTIS

PB97-122592
Chemical Effect in Ceramics Grinding.
PB97-122592 *03,113* Not available NTIS

PB97-122600
Capacitors with Very Low Loss: Cryogenic Vacuum-Gap Capacitors.
PB97-122600 *02,293* Not available NTIS

PB97-124135
Standards Activities of Organizations in the United States.
PB97-124135 *00,006* PC A99/MF E08

PB97-500342
Building Life Cycle Cost Computer Program (BLCC) Version 4.4-97 (for Microcomputers).
PB97-500342 *00,284* CP D02

RP2003
Low-Temperature Performance of Radiosonde Electric Hygrometer Elements.
AD-A295 319/8 *00,121* PC A02/MF A01

SHRP-A-335
Binder Characterization and Evaluation by Nuclear Magnetic Resonance Spectroscopy.
PB94-193471 *01,334* PC A08/MF A02

SHRP-C-373
Optimization of Highway Concrete Technology.
PB94-182995 *01,333* PC A13/MF A03

SWRI-4770
Evaluation of Wear Resistant Ceramic Valve Seats in Gas-Fueled Power Generation Engines. Topical Report, December 1991-April 1994.
PB95-200218 *02,466* PC A07/MF A02

TN-38
Design and Construction of a Liquid Hydrogen Temperature Refrigeration System.
AD-A286 618/4 *02,619* PC A03/MF A01

TRB/NCHRP-ID002
Development of a Method for Measuring Water-Stripping Resistance of Asphalt/Siliceous Aggregate Mixtures.
PB96-197249 *01,348* PC A04/MF A01

VTRC-96-R30
Application of Electromagnetic-Acoustic Transducers for Nondestructive Evaluation of Stresses in Steel Bridge Structures.
PB96-167978 *01,301* PC A04/MF A01

NIST Technical Publications

Periodical

Journal of Research of the National Institute of Standards and Technology—Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published bimonthly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program in support of the efforts of private-sector standardizing organizations.

Order the **following** *NIST publications—FIPS and NISTIRs—from the National Technical Information Service, Springfield, VA 22161.*

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NIST pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NIST Interagency Reports (NISTIR)—A special series of interim or final reports on work performed by NIST for outside sponsors (both government and nongovernment). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
